chemical engineers select top 10 inventions of modern era
Mar 18 2021

clean drinking water gasoline and antibiotics are the three most important chemical engineering inventions and solutions of the modern era according to survey of chemical engineers conducted by the institution of chemical engineers a professional engineering group with more than 36 000 members top 10 chemical engineering inventions
what is green chemistry
May 20 2021

green chemistry takes the epa s mandate a step further and creates a new reality for chemistry and engineering by asking chemists and engineers to design chemicals chemical processes and commercial products in a way that at the very least avoids the creation of toxics and waste green chemistry is not politics
