The Actor's Life Oct 05 2022 Jenna Fischer's Hollywood journey began at the age of 22 when she moved to Los Angeles from her hometown of St. Louis. With a theater degree in hand, she was determined, she was ready to work hard. So, what could go wrong? Uh, basically everything. The path to being a professional actor was so much more vast and competitive than she'd imagined. It would be eight long years before she landed her iconic role on The Office, nearly a decade of frustration, struggle, rejection and doubt. If only she'd had a handbook for the aspiring actor. Or, better yet, someone to show her the way—an established actor who could educate her about the business, manage her expectations, and reassure her in those moments of despair. Jenna wants to be that person for you. With amusing candor and wit, Fischer spells out the nuts and bolts of getting established in the profession, based on her own memorable and hilarious experiences. She tells you how to get the right headshot, what to look for in representation, and the importance of joining forces with other like-minded artists and creating your own work—invaluable advice personally acquired from her many years of struggle. She provides helpful hints on how to be gutsy and take risks, the tricks to good auditioning and callbacks, and how not to fall for certain scams (auditions in a guy's apartment are probably not leg-it—or at least not for the kind of part you're looking for!). Her inspiring, helpful guidance feels like a trusted friend who's made the journey, and has now returned to walk beside you, pointing out the pitfalls as you blaze your own path towards the life of a professional actor.

Straw Dogs Jan 16 2021 The British bestseller Straw Dogs is an exciting, radical work of philosophy, which sets out to challenge our most cherished assumptions about what it means to be human. From Plato to Christianity, from the Enlightenment to Nietzsche and Marx, the Western tradition has been based on arrogant and erroneous beliefs about human beings and their place in the world. Philosophies such as liberalism and Marxism think of humankind as a species whose destiny is to transcend natural limits and conquer the Earth. John Gray argues that this belief in human difference is a dangerous illusion and explores how the world and human life look once humanism has been finally abandoned. The result is an exhilarating, sometimes disturbing book that leads the reader to question our deepest-held beliefs. Will Self, in the New Statesman, called Straw Dogs his book of the year: "I read it once, I read it twice and took notes . . . I thought it that good." "Nothing will get you thinking as much as this brilliant book" (Sunday Telegraph).

Two Faces of Liberalism (Large Print 16pt) Feb 03 2020 Like its widely praised predecessor False Dawn, Two Faces of Liberalism, hailed by the Los Angeles Times as "elegant and powerful," offers a thoughtful and provocative analysis of the liberal tradition in politics. John Gray, an eminent professor at the London School of Economics, "picks large and interesting topics and says arresting things about them," according to the New York Review of Books. Two Faces of Liberalism argues that, in its beginning, liberalism contained two contradictory philosophies of tolerance. In one, it put forward the enlightenment vision of a universal civilization. In the other, it framed terms for peaceful coexistence between warring communities and between different ways of life. In this major contribution to political theory, Gray's new book "takes us beyond the current debate" (The New York Times Book Review) of traditional liberalism to keep up with the complex political realities of today's increasingly divided world.

Foundations of Topology Jul 22 2021 Topology is a branch of pure mathematics that deals with the abstract relationships found in geometry and analysis. Written with the mature student in mind, Foundations of Topology, Second Edition, provides a user-friendly, clear, and concise introduction to this fascinating area of mathematics. The author introduces topics that are well motivated with thorough proofs that make them easy to follow. Historical comments are dispersed throughout the text, and exercises, varying in degree of difficulty, are found at the end of each chapter. Foundations of Topology is an excellent text for teaching students how to develop the skill to write clear and precise proofs.

Gray's Anatomy Mar 06 2020 From the author of Straw Dogs, John Gray's Gray's Anatomy is a pugnacious and brilliantly readable collection of essays from across his career. Why is progress a pernicious myth? Why do beliefs that humanity can be improved end in farce or horror? Is atheism a hangover from Christian faith? John Gray, one of the most iconoclastic thinkers of our time, smashes through civilization's most cherished beliefs, overturning our view of the world, and our place in it. The most prescient of British public intellectuals Pankaj Mishra, Financial Times 'Gray has consistently anticipated the shape of things to come ... he teaches us that true humanism is to be found in uncertainty and doubt' Will Self 'Gray's dissection of modern delusion, cant and wishful thinking is to be welcomed in this moment of convulsion ... This is a book to learn from and argue with' Ben Wilson, Literary Review 'A thoroughly enjoyable book ... These essays cover a remarkable range of topics, from Isaiah Berlin to Damien Hirst, from torture to environmentalism. But their unifying theme is that our naive belief in the idea of progress has turned modern life into a constant round of shadow-boxing' David Runciman, Observer 'Demolishes the theory that we have reached the "end of history", the dogmas of secular liberalism, the weaknesses of financial casino capitalism and the limits of energy-intensive economic growth' Economist John Gray is most recently the acclaimed author of Straw Dogs: Thoughts on Humans and Other Animals, Heresies: Against Progress and Other Illusions, Al Qaeda and What It Means To Be Modern and Black Mass: Apocalyptic Religion and the Death of Utopia. He is Emeritus Professor of European Thought at the University of London.
