Ford FE Engines

The Ford FE engines, which were manufactured from the late 1950s all the way through the mid-1970s, were designated as the large-displacement engines in the Ford lineup. FE means Ford Edsel, and reflects an era when Ford sought to promote the Edsel name. The design of these engines was implemented to increase displacement over its predecessor, the Y-Block engines of the previous decade. Early models were fairly modest in displacement, as were most big-blocks of the era, but they grew quickly to fill the needs of rapidly changing chassis requirements and consumer demand for larger vehicles. As it grew, the FE engine performed admirably as a heavy passenger car and light truck engine. It also became quite accomplished in performance circles, winning the 24 Hours of Le Mans, as well as powering Ford’s muscle car and drag racing programs in the mid- to late 1960s. In this book, you will learn everything you need to know to rebuild one of these legendary engines. CarTech's unique Workbench series format takes you step-by-step through the entire rebuilding process. Covered are engine identification and selection, disassembly, cleaning, parts analysis and assessment, machine shop processes, replacement parts selection, re-assembly and start-up/break-in techniques. Along the way you find helpful tips on performance upgrades, trouble spots to look for, special tools required, and professional builder’s tips. FE master, owner of Survival Motorsports, and veteran author Barry
Rabotnick shares all of his tricks and secrets on building a durable and reliable FE engine. Whether you are simply rebuilding an old truck for reliable service use, restoring a 100-point show car, or building the foundation for a high-performance street and strip machine, this book will be an irreplaceable resource for all your future FE engine projects.

The Bronco permanently entered American popular culture on June 17, 1994, when a white 1992 model owned and driven by Al Cowlings with O. J. Simpson, who was wanted for the murders of his ex-wife and her friend, attempted to elude the Los Angeles Police Department in a low-speed chase, which was nationally televised and viewed by millions nationwide. This is complete story from conception through discontinuation in 1996, told by historian (and well-known "Ford guy") Paul McLaughlin utilizing his large collection of photographs, brochures, ads and other promotional material. Follow the Bronco's various incarnations from a small sport utility vehicle of the 1960s and 1970s into the larger full-size Bronco of the 1980s and 1990s, special models like the "Bill Stroppe Edition", "Eddie Bauer Specials", the Bronco II and other juicy tidbits like the Bronco concept vehicle that Ford took on the car show circuit in 2005 (which got Bronco enthusiasts so excited that Ford was going to add a Bronco vehicle to their lineup once again). Also covered are the Broncos that were raced in off-road desert racing, Bronco toys and other collectibles, specification sheets, production numbers, and other interesting facts. Finally, a book for all Bronco enthusiasts!

Rolling Shelter Feb 03 2020 Rolling Shelter is a personal account of Kelly and Rosana Hart's life in two different buses, three vans, two small motor homes, two travel trailers combined into one house, and two cars. Kelly tells stories of how they traveled through Mexico and Guatemala in a small van and then later developed a splendid home on their llama ranch in the mountains of Oregon. This book will inspire you and give you some ideas for how you might take advantage of vehicles to provide shelter in your life. In full color, the book features over 200 photographs and 5 detailed floor plans. With descriptions of how the conversions were accomplished, it is valuable both as an overview of vehicular dwelling and as a construction manual for how you might convert your own. One of the true joys of living in a vehicle is that it can be moved to new and exciting locations with relative ease. If you like to travel, but prefer to have your own bed and your own kitchen, then consider living in a motor home of some sort. The chapters include: "Our First Bus Home" shows the artistic conversion of a school bus parked on the rugged California coast. "Extra Wheels" describes a versatile step van and a Navy radar van used as a film studio. "Van Dwelling" features a Ford Econoline van equipped for travel into remote places and a VW Vanagon camper. "Juniper Ridge" shows how they made a unique home combining two long travel trailers into one home that could accommodate some of their llamas. "Tortuga & CanDo" were both small Dolphin motor homes built on Toyota trucks. "Here & There" was a full scale conversion of a 40 foot inter-city bus in which they traveled around the western United States.
